

As the holidays approach, decorations will appear in homes & across campus. While decking the

Be Safe With Holiday Lights:

About 1,300 people are sent to the emergency room every year due to holiday light accidents. Before you plug yours in, check for frayed wires, damaged sockets & gaps in the insulation. If you find problems, recycle the lights. The use of outdoor-grade lights indoors poses a fire hazard. Use indoor lights that contain the Underwriters Laboratories seal and follow the manufacturer's safety instructions. Never use holiday lights on a metallic, artificial tree. Remember to turn off your indoor lights before leaving your office for the evening.
